

INF20029 Assignment 1 Outline – Individual (Semester 2 2025)

Words Expectation: 2,000 +/-10%

Weighting: 30%

Due date: See Unit website

Assignment 1 submission details

- All references should be appropriately cited using the APA Referencing style.
 - Submit your report as ONE Microsoft Word document.
 - Save your file as follows: [student number_A1.filetype] e.g. 123456_A1.docx.
 - Submit your assignment via INF20029 Canvas> Assignments > Assignment 1.
-

Tasks

- Work as a business analyst for the project, UniLink – ABC University Student Enquiry and Appointment System.
- Review the project brief (in Canvas Assignment module) which outlines preliminary business needs of stakeholders.
- Prepare interview questions and conduct a live interview with the tutor (acting as a key stakeholder) in class to gather detailed user requirements.
- Review current documents and reports for requirement discovery (in Canvas Assignment module).
- Ask follow-up questions in class every week or in the Canvas discussion board.
- Analyse the requirement collected through interviews and reviewing documents.
- Collaborate with AI tools to perform high-level requirement analysis and modelling
- Prepare and submit the report, which contain three major parts and an appendix:
 1. Part A: Requirement gathering and initial analysis
 - Interview questions for different stakeholders
 - Questionnaire designed for stakeholders (a link of the Microsoft form)
 - Functional requirements of the proposed system
 - Epics of the proposed system
 - Non-functional requirements of the proposed system
 2. Part B: System analysis modelling
 - Current state process model (activity diagram) to handle student enquiries
 - Opportunities to improve
 - Future state process model (activity diagram) to handle student enquiries
 - Use case diagram of the proposed system
 - Entity relationship (ER) diagram of the proposed system
 3. Part C: Discussion
 - Based on literature research, discuss the use of AI technologies. Provide a brief (approximately 400 words) discussion supported by evidence from at least five (5) reputable literature sources (i.e., peer-reviewed journals and books). You could select from one of the following topics:
 - AI use in business/system analysis practices, tasks and role of business/system analyst
 - AI use in workplace
 - AI use in higher education

- Provide a critical reflection (approximately 400 words) on your process of using AI tools throughout the assignment. For example, how you assessed the outputs generated by AI tools, the extent to which you relied on automation versus applying your own judgment and expertise, reflection on the strengths and shortcomings of using AI tools in this context. You must support your reflection with specific examples from your assignment work.

4. Appendix (excluded for the word count)

Document and demonstrate your proper and effective use of generative AI to support diagramming and analysis. The whole artifact development process should be traceable:

- Include all prompts used with GenAI tools
- Include raw AI-generated output (e.g., PlantUML/Mermaid code, draft diagrams)
- Label each diagram iteration (e.g., AI Version 1, Human Revision 1)
- Use screenshots or code snippets where applicable
- Explain why each revision of AI-generated output was made (not just what changed)
- Explain how human revision and inputs (e.g., updated Mermaid code) refine AI-generated content to produce your work or how AI-generated output refine your work

Refer to the GenAI Use and Acknowledgements page under Assignment module in Canvas.

Submission Requirements (**IMPORTANT)

- You must use AI tools to support your work.
- The submission must be your own work, that is, it must be the result of your own readings, thoughts and discussion, and the expression of the ideas must be yours.
- Submissions that rely heavily on AI content without evidence of critical thinking, refinement, or traceability will not receive a passing grade for the assignment.
- Plagiarism – the action or practice of taking and using as one’s own, the thoughts, writings or other work of someone else – is not condoned by the University and severe penalties will be imposed where plagiarism is detected.

Submission Assistance

- Assistance can be obtained from the Helpdesk (03) 9214 5000 for any technical issues with submitting your assessment into Canvas.
- If it is after hours, you may email the assessment directly to the tutor and/or convenor to avoid late penalties.
